## REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance: Ueta teaches employing silane compound only in the lower coating before the outer coating is applied to iron-base powder for the purpose of improving the insulation property of the iron-based powder after annealing; therefore there is no motivation to modify the powder to include a <u>lubricant amount</u> of the silane compound in the lower layer because the lower layer is covered. Furthermore Ueta fails to teach or suggest a powder composition having particle size as required by the claims as well as the inclusion of graphite in the amount as required in the (now amended) claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
